

Farms roads, unpaved county roads, and agriculture access roads, are prime candidates for these applications in combatting PM-10. Producing a dust free environment.

Who We Are

About Us

Edmondson Construction Company is a fully licensed, bonded and insured General Engineering Contractor established in Lake Elsinore, California.

We specialize in grading, paving, site concrete work, and dust control. We have a large fleet of heavy equipment so we do not have to rely on rental equipment to complete your project.

We have professional operators with 20+ years of experience.

Dust Control: We utilize both magnesium and calcium chloride for your dust control need.

Applications on shoulders of taxi ways, and runways provide added safety.

Solar Energy Farms are proven testaments Of dust abatement, in keeping the mirrors clean and producing their maximum efficiency in energy output.
